PREFACE

This is the ninth and final issue of a series of reports published monthly or bi-monthly in an effort to provide continuous information on 28 selected military complexes, marshalling yards, storage areas and transfer points in South China and North Vietnam.\* The targets have been selected as those most likely to provide indications of a military buildup.

This study utilizes all photographic coverage taken and available during the preceding month. Only those targets covered by interpretable photography are analysed and these are arranged alphabetically within country. The quality of photography for each entry is given with the mission reference

\* Effective 1 February 1967, targets in South China will be included in the series of reports, "Review of Selected Soviet and Chinese Ground Force Installations", published by IAS for each [ ] photographic mission [ ] coverage of these targets is also incorporated in these publications). Targets in North Vietnam will be included in the series of reports "Status of North Vietnamese Railroads" published weekly by the Imagery Analysis Staff.

VI. KUEI-HSIEN MILITARY COMPLEX 23 07N-109 38E

25X1

Reference Mission

25X1

No apparent change in military facilities is observed in cloud free areas.

VII. KUEI-LIN MILITARY FACILITIES 25 11N-110 20E

Reference Mission

25X1

The area is 95 percent cloud covered and no changes are observed in cloud free areas.

VIII. KUN-MING GENERAL SUPPLY DEPOT 25 01N-102 44E

25X1

Reference Missions

25X1

A. No changes in facilities are observed

25X1

25X1

B. An undetermined amount of equipment/units of rolling stock is observed at the rail siding on the south edge of the plant. No equipment is identifiable within the supply depot.

IX. LIU-CHOU AREA 24 20N-109 24E

Reference Mission

25X1

A. No change in facilities is observed.

B. An undetermined number of units of rolling stock is observed at two larger railyards.

X. MA-LI-PO SUPPLY DEPOT 23 07N-104 43E

25X1

Reference Missions

25X1

No change in facilities is observed  
No equipment is observed.
